

S4 Sample: Multi-Page Continuity

Continuous Narrative Section

[illegible]

evidence chains must remain verifiable across page boundaries. Padding prose follows, deliberately repetitive: evidence chains must remain verifiable across page boundaries. Padding prose follows, deliberately repetitive: evidence chains must remain verifiable across page boundaries. Padding prose follows, deliberately repetitive: evidence chains must remain verifiable across page boundaries. Padding prose follows, deliberately repetitive: evidence chains must remain verifiable across page boundaries. Padding prose follows, deliberately repetitive: evidence chains must remain verifiable across page boundaries. Padding prose follows, deliberately repetitive: evidence chains must remain verifiable across page boundaries. Padding prose follows, deliberately repetitive: evidence chains must remain verifiable across page boundaries. Padding prose follows, deliberately repetitive: evidence chains must remain verifiable across page boundaries. Padding prose follows, deliberately repetitive: evidence chains must remain verifiable across page boundaries. This sentence is the paragraph tail that lands on page two: S4-PAGE-TAIL-ANCHOR.

Cross-Page Table Section

The ruled table below starts near the bottom of page two and continues on page three with the same column layout.

metric	definition	gate
recall_at_5	anchor questions hit in top 5	1.000
mrr_anchor	mean reciprocal rank on anchors	no drop

metric	definition	gate
leak_count	unanswerable questions answered	0
error_skip	errored or skipped eval items	0

Closing paragraph of S4 on page three. S4-PAGE-TAIL-ANCHOR and every table cell above are registered anchors; their presence in normalized output is the multi-page preservation contract of this sample.
